

Spoštovani,

vljudno vas vabimo na **skupno srečanje vseh doktorskih študentov/-tk Humanistike in družboslovja, ki bo potekalo v ponedeljek, 26. oktobra, ob 17:00 v Veliki dvorani FDV** z okroglo mizo ***Je umetna inteligenca zgolj novo orodje raziskovalcev ali pa smo priča največji epistemološki preobrazbi znanosti po digitalni revoluciji?*** V času, ko se meje med disciplinami brišejo hitreje kot kadarkoli prej, se spreminja tudi sam lik znanstvenika. Na dogodku bomo skupaj z vodilnimi raziskovalci, razvijalci slovenskega jezikovnega modela GaMS ter strokovnjaki iz akademskega in zasebnega sektorja raziskovali, kako umetna inteligenca preoblikuje znanstveno delo, kakšne nove možnosti odpira in katere etične, družbene ter politične dileme prinaša. Razprava bo segla od vprašanj infrastrukture in podatkov do širšega vprašanja, kakšno prihodnost znanja pravzaprav gradimo. Veselimo se srečanja z vami in vam želimo uspešen študij!

Lep pozdrav!

Prof. dr. Tanja Kamin
Prodekanja za mednarodno sodelovanje in doktorski študij

Izr. prof. dr. Sašo Jerše
Prodekan za doktorski študij in znanstvenoraziskovalno delo FF

Dear all,

We kindly invite you to **a joint meeting of all doctoral students of the Humanities and Social Sciences organized on Monday, October 26th, at 5 pm in the Grand Hall of the Faculty of Humanities and Social Sciences** with a round table on ***Is artificial intelligence just a new tool for researchers, or are we witnessing the biggest epistemological transformation of science since the digital revolution?*** At a time when the borders between disciplines are fading faster than ever, the very figure of the scientist is also changing. At the event, we will explore together with leading researchers, developers of the Slovenian language model GaMS, and experts from both academia and the private sector, how artificial intelligence is reshaping scientific work, what new opportunities it opens up, and what ethical, social, and political dilemmas it brings. The discussion will cover everything from questions of infrastructure and data to the broader question of what kind of future for knowledge we are actually building. We look forward to meeting you and wish you successful studies!

Best regards!

Prof. dr. Tanja Kamin
Vice-Dean for International Cooperation and Doctoral Studies

Izr. prof. dr. Sašo Jerše
Associate Dean of Doctoral Studies (3rd Cycle) and Research
